

Roundtable

Energy Efficient Windows

Invitation

September 17, 2012, 5:30pm – 8:30pm (Roundtable: 6:00pm – 8:00pm)
Wooden Window, Inc. Conference Room – 849 29th Street, Oakland

Following the success of our first two Roundtables, Spray Foam and Cool Roofs, our next Roundtable is on the subject of Energy Efficient Windows.

Big improvements have been made in the technology of energy efficient windows over the past few years. Come to our Roundtable to learn how, when and why to specify and use the many options available in today's market. Find out about the different standards for measuring the energy efficiency of windows in the US and Europe and how to use this information to your advantage. Discover why it might not be a good idea to install energy efficient windows in a leaky building with uninsulated walls.

Experts on the topic will hold an open and frank panel discussion about energy efficient windows. There will be an opportunity to get your questions answered about this important element of zero net energy buildings.

The panel of Roundtable speakers:

Graham Irwin

Certified Passive House Consultant
ESSENTIAL HABITAT

Tom Herron

Senior Manager, Communications and Marketing
National Fenestration Rating Council
